

AI in Grant Writing

Best Practices for Effective and Ethical Use

Tuesday October 21, 2025 12:00 Noon to 1:00 PM (CST)

An Online Workshop Sponsored by the Division of Research and Innovation

Jill Jividen, Ph.D.
University of Michigan

Artificial Intelligence (AI) is rapidly transforming the landscape of research development, offering powerful tools for crafting compelling and compliant grant proposals. This webinar will offer practical tips for how AI can streamline proposal development and enhance writing clarity, while also maintaining ethical standards. In this presentation, Dr. Jill Jividen and Ms. Marta Collier-Youngblood will provide concrete strategies for how to leverage AI for literature reviews and critical feedback, as well as for safeguarding novel ideas and aligning with funder guidelines. Attention will be given to ethical considerations, including confidentiality, data security, attribution, and responsible use, ensuring compliance with institutional and funding agency policies.

Marta Collier-Youngblood, M.A.
Youngblood & Associates, LLC

By the end of this session, participants will be able to identify appropriate ways to integrate AI into their grant writing process, apply best practices for protecting intellectual property and sensitive data, and ensure their use of AI tools aligns with both ethical standards and funder compliance requirements.

To register, please submit the form available [HERE](#).
